

Tags

This file contains a global index of all tags used on the pages.

Original

- 0-1 BFS
- Basic Geometry
- Binary Search
- Bit manipulation
- Continued fractions
- Convex hull trick and Li Chao tree
- Deleting from a data structure in $O(T(n) \log n)$
- Divide and Conquer DP
- Factoring Exponentiation
- Half-plane intersection - S&I Algorithm in $O(N \log N)$
- Half-plane intersection - S&I Algorithm in $O(N \log N)$ (Fixed Maybe)
- Integer factorization
- Introduction to Dynamic Programming
- Knapsack Problem
- Knuth's Optimization
- Kraut & Determinant
- Lattice points of non-lattice polygon
- MEX task (Minimal Excluded element in an array)
- Manhattan Distance
- Maximum flow - MPM algorithm
- Minimum Enclosing Circle
- Minkowski sum of convex polygons
- Montgomery Multiplication
- Number of divisors / sum of divisors
